

## Benefits of a Managed Backup

### Low Cost of Ownership

A fully managed data backup and restore solution for the same or less than a capital purchase that you have to manage yourself.

### Total Peace of Mind

Thanks to centralized management and monitoring by our NOC team, you can rest assured that your business data is safe and being handled by experts. Which means you can focus on your business.

### Reduce Your Day-to-Day Operating Costs

While most solutions require full backups periodically or in some cases daily, our solution only requires an initial full backup then from that point stores only incremental file changes. Saving you money in storage space, data transfer costs and server load.

### Safeguard Business Information

Since the solution takes backups in terms of changes, you will be able to recover files, even older revisions.

### Ensure Business Continuity

Backup your most critical business applications to ensure that you can get quick access to restore systems that would have the most impact to your day-to-day operations if they were down.

### Increase Productivity and Decrease Downtime

With our rapid restore capabilities, we will minimize the costs associated with lost productivity and downtime.

### Detailed Reporting Information

No longer will you be unsure of how well your data is protected. We will provide you with reports monthly that let you know that your data is safe!

## Why our clients choose our Managed Backup Solution

### Reduced Costs:

- Less storage space required
- Less bandwidth needed
- Recover to dissimilar hardware if needed

### Increased Awareness:

- Centralized NOC Management and Monitoring by our engineering team
- Detailed monthly reports on backup status

### Improved Productivity:

- Back up more data in less time
- Minimize downtime with faster restore times

### Increased Confidence:

- Regular backups minimize business downtime in the event of a data loss
- Backups are always scheduled and managed by experts

### Threats facing SMBs today:

- **Loss of Data**
- **Failed Restores**
- **Costly Upkeep**
- **Unreliable Systems**
- **Compliance**
- **Cost of Downtime**

Program Features		Remote Backup Manager
Initial Data Assessment and Plan	Included	Our engineers will assess your critical data and develop a comprehensive backup plan that protects your critical data.
Disk Based Backup Deployment and Configuration	Included	Installation of our enterprise class disk based backup and recovery software.
Monthly Backup Capacity and Performance Reporting	Included	Regular reporting demonstrating the effectiveness of the backup solution and ensuring efficient use of resources.
Monitored and Managed by our NOC	Included	Our team of NOC engineers work in the background to ensure backups are successful and critical data is protected.
Remote Backup to Cloud	Included	Important files and folders are stored in the cloud in case of critical failure.
Disaster Recovery Planning	Included	Advanced Disaster Recovery options are available to eliminate the risk of data loss and protect your business.
<b>Essential Support</b> <ul style="list-style-type: none"><li>• Asset Discovery and Reporting</li><li>• Device Health Monitoring</li></ul>	Value Added Service	Our NOC team is available to assist with all your support needs by actively monitoring your systems for critical failure.
